

Convened by
 Transportation Research Board's Marine Group Technical Activities Committees
 and the Marine Board

Sponsored by
 U.S. Committee on the Marine Transportation System (CMTS)

This sixth biennial conference in partnership with the U.S. Committee on the Marine Transportation System (CMTS) will showcase current and emerging innovative science and technologies related to maritime transportation. Join your colleagues from government, industry, and academia to examine the rapidly evolving applications of autonomous and automated technologies. Through engaged discussion and debate with noted thought leaders, directed panelists, and leading scientists and engineers, we will explore the direction, technical challenges, enabling technologies, and potential hurdles to successfully navigate the future of the marine transportation system.
